A Fish Resources Survey of North Carolina's Bay Lakes, David Frey and Edward Hueske.

A New Geography of North Carolina, Bill Sharpe, Sharp Publishing Company, Raleigh, 1961, pp. 1143 - 1149.

PREFACE

In an effort to determine what actions, if any, are needed to guide the development of White Lake as an urban community, the Board of Commissioners of the Town of White Lake requested the Division of Community Planning of the North Carolina Department of Conservation and Development to make a study of the White Lake Community - its characteristics, its assets, and its liabilities. Federal funds to assist the Town of White Lake in financing the project were obtained and the study was undertaken.

This report contains the findings of the study. The text is divided into five basic sections; the first deals with the setting of White Lake and its natural characteristics; the second relates information about the population and economic situation of the town; the third describes the use of land in the community; the fourth cites development problems, and suggested solutions; and the concluding section presents and discusses a development plan for White Lake.
